## **DETAILED ACTION**

### ***Status of the Application***

The IDS PTO-1449 (Paper No. 4) received on July 18, 2001 has been entered.

Claims 1-22 are pending in the present application and are subject to restriction and election of species requirements.

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 (partial) and claims 2-6, 8-14 (full), drawn to a process, system and kit for the analysis of biological samples.

Group II, claim(s) 1,7 (partial) and claims 15-22 (full), drawn to a process and a kit for determining skin cholesterol levels.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I recites of an in vitro analysis of liquid and semi-solid body secretions collected from a patient to be diagnosed for evidence of abnormalities whereas Group II recites of an in vivo analysis method for analyzing a patient's skin surface for cholesterol. The 2 Groups also utilize different reagents, substrates and enzymes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
